1. İSTAÇ (İstanbul Environmental Protection and Waste Processing Co.)

İSTAÇ is one of the leading environmental management companies in Turkey. Founded in 1994 as an affiliate of Istanbul Metropolitan Municipality, the company started to operate the first sanitary landfill in Turkey. İSTAÇ has demonstrated great success in terms of environmental management in Turkey thanks to its high quality service delivery, integrated waste management and research & development.

Headquartered in Şişli district of Istanbul, İSTAÇ owns over 40 operational units. Over 4 thousand personnel are employed by İSTAÇ and its mission is to create unique solutions and raise environmental awareness with an environment-friendly approach for a more livable world.
Carrying out services in city hygiene, coastal hygiene and waste management, some of the remarkable statistics on İSTAÇ’s services are listed below:

- İSTAÇ operates 40 facilities.
- Domestic waste produced in Istanbul is 17,000 daily.
- Mechanical sweeping area covered by İSTAÇ daily is 6.5 million square meters.
- Total area swept by İSTAÇ in Istanbul’s squares is 300,000 square meters.
- Electricity generation from landfill gas by Istanbul’s sanitary landfills accounts to 52MW (enough to provide for the domestic electricity needs of a million people).
- Compost generation from organic waste in Istanbul accounts to 20,000 tons per year.
- Medical waste collected from medical facilities in Istanbul for disposal after treatment accounts to 20,000 tons per year.
- 10,000 medical facilities in Istanbul receive collection service for their medical waste.
- Waste collected from ships passing through Istanbul to be recycled and for disposal accounts to 200,000m$^3$ per year.
- Total of 515km of shorelines in Istanbul are monitored for cleanliness.
- Total 5,000,000m$^2$ of sea surface in Istanbul receives regular weekly treatment.
- Total 4,500,000m$^2$ of beach area in Istanbul receives waste collection during summer.

2. ISFALT (ASPHALT PLANTS INDUSTRY & TRADE COMPANY)

ISFALT was founded in 1986 to provide for the asphalt requirements of Istanbul Metropolitan Municipality and district municipalities.

ISFALT’s areas of operation are asphalt production, asphalt applications, research and development, recycling, technical assistance and training, divided road solutions, fight against winter conditions and preventive maintenance.
ISFALT serves Istanbul in 4 production plants across the city. The company is accredited in 41 different experimental methods. 18 of its products hold CE and TSE certifications.

All of its plants pay particular importance to environmental and human health in accordance with the ISO 14001 and OHSAS 18001 certificates. The company’s main resource for fuel and energy is natural gas.

Complete production capacities of the plants:
Habibler Plant: 660 tons per hour; Aydınlı Plant: 520 tons per hour;
Mahmutbey Plant: 300 tons per hour; Ümraniye Plant: 457 tons per hour.

These facilities have a production capacity of 1,955 tons per hour.
The company produced 32,481,818 tons of asphalt in 2004-2016.

A total 18,237,820 tons of asphalt were utilized in private commissions by Istanbul Metropolitan Municipality and Istanbul Water and Sewerage Administration.

The company’s asphalt production ranges from mastic, stone mastic and ready-made asphalt to silent asphalt, colored asphalt and modified asphalt.

ISFALT further offers training and technical advice in asphalt-related areas for all Turkish cities and district municipalities. The company is particularly unique and prominent in recycling and producing and practicing innovations such as warm, silent and mastic asphalt.

Recycling in asphalt production has been in effect since 2007. 1,433,000 tons as waste asphalt has been recycled in 9 years thus contributing to environmental conservation and global warming prevention in a considerable fashion.

Within the framework of R&D activities, ISFALT cooperates with universities, TUBITAK (Scientific and Technological Research Council of Turkey) and the Directorate General for Highways at the national level and the Asphalt Institute at the international level.

As a result of R&D research, a total of 125 products were produced, 12 of which being patented.

The central laboratory of ISFALT is composed of 5 test rooms: Aggregate laboratory, bitumen–emulsion laboratory, blending laboratory, wheel track laboratory and superpave laboratory.

The test rooms where 91 tests are conducted offer services to the Turkish Standards Institution, directorates of highways, universities, and municipalities at city and district level as well as the private sector.

3. ISBAK (Istanbul Transportation Telecommunication and Security Technologies Co.)

ISBAK was founded in 1986 with the aim of realizing traffic and system engineering works as well as offering project design and implementation services.

In the early years of its foundation, ISBAK carried out traffic signaling works of Istanbul and maintenance-repair works of IMM’s vehicles. With the establishment of a Research and Development Department in 1995, the company expanded its fields of activity and professionally engaged in Smart Transportation Systems, particularly traffic signaling systems. In its Kağıthane campus, ISBAK gives direction to technological developments in Smart Transportation Systems based on more than 30 years of experience it acquired. It has been
introducing many innovations, including the first signaling system of Turkey, and making its own technological revolution. Transforming its expertise in traffic management systems to innovative and efficient solutions at its R&D center, the first licensed on-the-spot center in smart transportation systems, ISBAK represents the technological side of IMM.

ISBAK has undergone an institutional transformation in line with Istanbul Metropolitan Municipality’s vision for today: “Smart City Istanbul”, a project conducted by the company itself. ISBAK upgrades its mission, vision and principles in order to utilize its smart transportation experiences in smart city solutions and shapes its activities as a Smart City Architect. The company continues working and cooperating in order to contribute to the development of R&D activities, innovation, local production and entrepreneurship via sustainable solutions offered within the scope of the “Smart City Istanbul” project.

**ISBAK offers solutions in:**

- Planning and Consulting
- Smart Cities
- Smart Transportation Systems
- Electronic Detection System (EDS)
- Communication and Security Systems
- Smart Lighting Systems
- Tunnel Management Systems
- Fleet Management Systems
- Traffic Signaling Systems
- Traffic Measurement Systems
- Variable Message Systems

**4. KÜLTÜR (CULTURE Co.)**

With the motto “Culture is our profit” Kültür Co. was founded in 1989 by Istanbul Metropolitan Municipality to provide culture, art and tourism services and it became one of the prominent figures of the cultural and artistic life in Istanbul.

In line with its founding objectives, Kültür Co. prepares various organizations to promote Istanbul’s cultural, geographical and artistic beauties in Turkey and abroad, such as cultural events, publishing activities, operation of museums and cultural venues, open air advertisements, national and international symposia and festivals.

Quality system foreseen by ISO – 9002/1994 was set up and documented to ensure that Kültür Co.’s products and services comply with standards and conditions and to guarantee sustainable quality. Quality management system indicated by ISO 9001:2000 was set up in 2003.
With Miniatürk (Miniatürk Turkey Park), Basilica Cistern, Panorama 1453 History Museum, Topkapı Turkish Worlds, and such brands as Istanbul Bookshop and Hediyem Istanbul, KültürCo. both breathes a new life into Istanbul’s culture and art sector and provides acceleration to the sector for cultural industries.

It serves the people of Istanbul with 183 newspaper kiosks and 42 flower stations in various locations around the city.

As a prominent figure for open air advertisement in Istanbul, Kültür Co. serves with 4050 light billboards and 90 mega lights at Led screen applications located in Mecidiyeköy, Kadıköy, Beşiktaş, Bakırköy, Maçka, Eytam, Palladium Mall in Ataşehir and Zorlu Mall in Zincirlikuyu.

With its 25 cultural venues, Kültür Co. organizes more than 250 cultural and artistic events in a month throughout the year.

5. METRO ISTANBUL Co.

Metro Istanbul was founded in 1988 to operate finished railed system lines and to undertake the maintenance and repairing works of them. It currently operates 11 city railed systems that are 134 km long, including subway, tram, funicular and cable car lines.

Operation Planning, Traffic Management, Station Services and Control Centre Administration can be listed among other works of Metro Istanbul.

Metro Istanbul provides service to some 2.000.000 passengers on a daily basis from its administration centre in Istanbul Esenler with more than 6400 personnel.

M2 Yenikapı – Hacıosman subway line is one of the lines that Metro Istanbul operates. Length of the line is 23.5 km while it carries 450.000 passengers per day.

Another important line that Metro Istanbul operates is M1A Yenikapı – Otogar (Bus Terminal) – Atatürk Airport subway line. Carrying 450.000 passengers per day, this subway line travels 18 stations in 32 minutes, therefore reduces the intensity of inter-city transportation greatly.

In addition, the T1 Bağcılar-Kabataş Metro Line was selected as the best practice in the world to meet the high passenger demand by the International Association of Public Transportation. With a total length of 19 kilometers and serving 400,000 passengers a day, this line provides fast and comfortable transportation especially on the historic peninsula.
Metro Istanbul also operates; M3 Kirazlı-Olimpiyat- Başakşehir metro, M4 Kadıköy-Tavşantepe metro, M6 Levent- Boğaziçi Ü. / Hisarüstü metro, T3 Kadıköy-Moda tram, T4 Topkapı- Masjid-i Selam tram, F1 Taksim- Kabatas funicular and Maçka and Eyüp cable car lines.

6. İSTANBUL HALK EKMEK (Istanbul Public Bread Co.)

İstanbul Halk Ekmek Co. (IHE) was established in 1978 to provide Istanbul residents with regular, inexpensive, healthy and quality breads and all kinds of flour and bakery products by producing, distributing and providing all the necessary units.

IHE has been serving the needs of Istanbul residents for regular, healthy, quality and inexpensive bread, flour and bakery products with 834 employees for 38 years.

Having the most modern facilities in Turkey, IHE manufactures its products in a hygienic environment, without human contact and maintaining high quality in all stages of its production. 12% of Istanbul's bread needs are met by IHE in 2487 sale points.

Halk Ekmek Co. offers the most basic food product to the people of Istanbul in a cheap and healthy manner and plays a regulatory role in determining the prices.

İSTANBUL HALK EKMEK, which has a production capacity of 1 million 800 thousand loaves of bread per day in 14 production lines, delivers 61 kinds of product to Istanbul residents through kiosks, markets, chain stores, mass consumption points and bread sales stores.

The Stone Based Production Line, which was established at Kartal Cevizli Plant, has 30 thousand loaves of 60 gr bread production capacity. Production is carried about 700 meters from the flour silos to the packaging in the production line untouched.

İstanbul HALK EKMEK produces gluten-free bread and gluten-free mixture in partnership with Istanbul University Cerrahpaşa Faculty of Medicine Department of Child Health and Metabolism Diseases within a project that will solve the nutritional problem of gluten-free consumers to a great extent.
Istanbul Halk Ekmek Co. has been certified by the Turkish Standards Institute (TSE) by obtaining the certificates of TSE ISO EN 9001 Quality Management System and TSE EN ISO 22000 Food Safety Management System in order to meet the satisfaction of its customers and to provide high quality and healthy service.

7. **SPOR (Istanbul Sports Events and Operation Co.)**

Spor Co. was founded in 1989 with an attempt to put IMM’s sports centers into service, foster healthy growth of youth through organizations and events and provide support to sport infrastructure in Turkey.

Spor Co. provides service with 1596 employees with the aim of spreading the sports practice with modern ways in society by raising awareness and interest about sports and leading the way of sport services with the efficient use of resources and enhancing life satisfaction and quality of people.

Spor Co. nationally and internationally organizes scientific, technical, educational, touristic, cultural events like festivities, exhibitions, tours, camps, conferences, seminars, and training programs in every sport branch.

Spor Co. provides services for 28 sports branches and in 41 sports complexes in Istanbul.

Since it was initiated by the protocol dated 2004 and signed bilaterally by Spor Co. and Istanbul Health Enterprises Co., persons with disabilities benefiting from the services of Directorate of People with Disabilities have been provided with sports therapy and rehab services by Spor Co.

The most important project on social responsibility conducted by Spor Co. named as “Towards Healthier Generations with Sports” was carried out in August 2008. In total, Istanbulites have been provided with free service in 41 sports complex and in 28 branches (Basketball, Swimming, Fitness, Football, Pilates, Self Defense, Step Aerobic, Tennis and Volleyball).
Workouts (physical-fitness exercises, walking, running, pilates and step-aerobic) accompanied by music have been organized seven days a week between 07.00-09.00 in the morning with 29 professional trainers in 22 different districts on 28 spots in outdoor areas such as parks, forests, groves, stadiums and coasts.

Along with organizing the Vodafone Istanbul Marathon, one of the major sports events in Turkey and the world, Spor Co. also organizes six-stage road race “Fun Run Series” to raise the number of attendees to road races in Turkey and to adopt new-comers to short distance races. Istanbul Kids Marathon as the biggest kids’ marathon of Turkey is also organized by Spor Co.

8. **ISPAR**K (Istanbul Parking Enterprises Co.)

Founded in 2005 as an affiliate of IMM, ISPARK conducts projects creating modern solutions for parking problems concerning vehicles, aircrafts and boats in Istanbul. Operating IMM’s parking lots and multi-level car parking garages centrally and systematically, ISPARK provides service in 606 parking lots with a 95.0000-car capacity.

In Istanbul, a city with 3.5 million vehicles, ISPARK carries out semi-automatic, full-automatic and carousel projects in multi-level garages and parking lots to reduce traffic congestion and promote an easier parking experience by directing drivers to public transportation. In general, 3.5 million people benefit from the “Park and Ride” Project with the capacity of 14 thousand cars at 44 traffic spots.

ISPAR**K** has initiated the Boat Parking Project to create modern and sustainable solutions to boat parking problems in Istanbul. Today ISPARK has a 430 boat capacity in total with 180 boats at Istinye Bay and 250 boats at Tarabya Bay. The capacity is expected to rise to 2,500 boats with future investments.

ISPAR**K** Co. is establishing charging stations for electric cars in parking lots and multi-level parking garages. These charging stations function at 12 parking spots in the city including Balmumcu Multi-Level Parking Lot, Bostancı Günaydın Parking lot, Cihangir Multi-Level Parking Lot, Kadıköy ISKI Treatment Plant Parking lot, Merter Multi-Level parking lot and Umraniye Haldun Alagas Multi-level parking lot.

ISPAR**K** Co. carried out the Bicycle Parking Project in 2009 to increase environmental consciousness in Istanbul. The project was upgraded with today’s technology and ISBIKE (Smart Bicycle Renting System) was established.

ISPAR**K** Co. provides service at Kadıköy-Kartal-Maltepe shoreline at 14 stations with a 140 bicycle capacity and at Florya-Yesilköy shoreline at 5 stations with a 60 bicycle capacity. ISPARK Co. also organized the very first “Park and Ride” Project in Turkey. “Park and Ride” parking lots withdraw a
100km car queue from traffic and serve Istanbulites at 40 different traffic spots with a 14.000 car capacity.

ISPARK Co. puts mechanical parking system, semi-automatic parking system and carousel parking system in riders’ service at multi-level parking garages and parking lots at congestion spots in Istanbul.

9. KIPTAS (Istanbul Residence Development Plan Industry and Trade Co.)

KIPTAS was established in 1995 by Istanbul Metropolitan Municipality with an aim to find solutions to the housing problems and build modern, livable and reliable living spaces by preventing unplanned settlement. Having produced livable and safe cities in different zones of Istanbul, KIPTAS does not only prevent unplanned settlements but also comes into prominence as the aesthetic space window of developing Istanbul.

Without disturbing the historical and natural structure of the city and by protecting the forests and water basins, KIPTAS generates and implements alternative plans for the production of aesthetic and livable settlement units which may speak to all income groups with proper infrastructure solutions and integration with the neighborhood and nature in this direction.

KIPTAS has constructed 75.000 houses since its establishment. In addition to that, it also provided the roads, waste water and rain water channels, fresh water distribution lines, energy, telephone and natural gas lines, street lighting, landscaping, planting, kids’ playgrounds, parking lots, shopping centers, faith and health facilities, schools, kindergartens and sports areas for the enjoyment of the inhabitants.

KIPTAS constructed 75.476 houses by the end of 2016.
10. **IGDAS (Istanbul Gas Distribution Industry and Trade Co.)**

IGDAS Inc. was established in 1986 in order to meet the energy needs of Istanbul.

As a prominent and leading natural gas distribution company serving more than 6 million subscribers and selling 5.7 billion cubic meters of natural gas annually, IGDAS Co. is ranked as the 28th largest among other 500 companies in Turkey.

Thanks to IGDAS’s total natural gas sub-investments exceeding 17,000 kilometers, Sulphur Dioxide (SO2) levels in Istanbul have been reduced to a much lower level (5 micrograms/cubic meters) than the standards set by World Health Organization (WHO) and European Union (EU).

With the strong capability to serve 6.5 million subscribers, the investments made by IGDAS are as follows:

- Steel Line: 1,831 km
- Polyethylene line: 15,500 km
- Total number of lines: 17,330 km
- Service Box: 855,709 km
- Number of Customer Stations: 780

Having used the EFQM (the European Foundation for Quality Management) Excellence Model, IGDAS was awarded the National Quality Grand Prize as granted by Turkish Quality Foundation (KALDER) in 2011.

IGDAS serves its customers in 39 districts of Istanbul with 3 regional directorates, 17 service buildings and 72 payment points.

In Pendik and Esenyurt districts, IGDAS has the largest A-type decompression and measurement station in Turkey with a capacity of 800,000 Sm3/h and +200,000 Sm3/h respectively. IGDAS has increased its nominal gas production capacity from 2,870,000m3/h to 3,776,000.

Completing its substructure and superstructure, IGDAS provides safe natural gas to its 6,191,553 subscribers and 5,900,519 natural gas users in 18 different points with its RMS stations, 742 technical staff, 113 emergency team vehicles and 32 network chiefdoms in accordance with its 24/7 service principle.
Thanks to its project of Natural Gas Network Earthquake Risk Reducing System, IGDAS, in its main headquarters, automatically evaluates the data submitted through the early warning system by tracking them through satellites in 15 different stations. IGDAS serves its subscribers 24/7 with its emergency telephone number 187.

11. SAGLIK (Istanbul Health Investments and Operation, Social Services Industry and Trade Co.)

SAGLIK Co. provides management services and human resources to the projects concerning the disabled, the elderly, children, women and the citizens as a whole within the scope of health and social services as offered by the Istanbul Metropolitan Municipality.

SAGLIK Co. has a significant organizational power providing an approach of quality service and professional labor for the health and social oriented projects of Istanbul Metropolitan Municipality.

Aiming at delivering its services comprehensively and easily to each and every citizen without any kind of discrimination, contributing to physical and psychological integrity of individuals, coordinating and guiding people in need of health and social services, placing a particular emphasis on the environment and public health and enabling its staff to offer training and consultancy services for anybody at anytime and anywhere, SAGLIK Co. acts with the principle of “Safety in Service.”

Activities and Projects Conducted by SAGLIK Co.;

Within the scope of Protection of Women’s and Family Health Services, SAGLIK Co., with its 16 Psychological Counseling Centers (PDM), 13 Istanbul Family Consulting and Training Centers (ISADEM) and 2 psychotherapy centers, offers a range of services from psychological counseling and psychotherapy to breast cancer screening and training services so as to protect women’s health and family integrity.

Within The Scope of Medical Home Care Services, SAGLIK Co. offers healthcare and rehabilitation services to the sick, people in need of medical care and their relatives in the person’s house. Within the scope of this project, 321,604 at-home medical examination services, 945,646 at-home nursing and care services, 183,163 at-home physical therapy services, 35,660 at-home psychologist services, 74,143 hours of in-hospital companionship services, 20,154 at-home personal cleaning services and 34,775 patient transfers have been offered so far.
Within The Scope of Ambulatory Diagnosis and Treatment Services, SAGLIK Co. provides medical services to Istanbulites in various medical centers including Şehzadebaşı, Tozkoporan and Kayışdağı medical centers.

Within The Scope of Vector Control Services, SAGLIK Co. has provided services to fight against mosquitoes in 145,084 mosquito reproduction points and rodents and cockroaches in 647,279 storm drains and rodents’ natural nesting spots with 172 fully equipped vehicles in 84,299 addresses and 6 centers located in both Asian and European sides.

Within The Scope of Funeral and Burial Services as conducted by Directorate of Cemeteries, an average of 45,000 burials are carried out in 39 districts of Istanbul each year and SAGLIK Co. serves with its 132 funeral vehicles in a total of 370 Muslim cemeteries.

Within the Scope of the Center for the People with Disabilities affiliated with the Directorate of People with Disabilities, Summer Camp for People with Disabilities and Transportation Services, SAGLIK Co. has offered 165,000 number of disabled services in Istanbul. Besides rehabilitation and training services provided by the centers, transportation services are also offered for the elderly above 70 years of age with a fleet of 86 minibuses made up of 43 lifted and specially equipped and 43 standard minibuses. In addition to the services offered in centers and summer camps, as of 2016, 256,000 people have been provided with free transport services.

Within the Scope of Kindergarten and Pre-school Services, SAGLIK Co. offers kindergarten and pre-schooling services for 0-66 month old children of personnel working for Istanbul Metropolitan Municipality or its affiliated institutions. As of 2016, through making contract with 750 kindergartens, 1472 students have been provided with kindergarten services.

Within the Scope of Rehabilitation Services for Strayed Animals, rehabilitation and treatment services are carried out at the Animal Hospital under the Directorate of Veterinary Services, in Fatih district. Additionally, strayed and neglected animals are rehabilitated in rehabilitation shelters for animals established in Aydınıl, Orhanlı, Tepeören, Cebeci, Hasdal and Sarıyer districts.

Within the Scope of Lifeguard services in Istanbul Beaches, SAGLIK Co. provides first aid services during drowning and sickness incidents taking place within the limits of Coastline Protection Zones in 38 different beaches in Istanbul. As of 2016, 6462 rescue services have been provided.

Within the Scope of Women and Family Oriented Projects as conducted by Women Coordination Center, SAGLIK Co. provides a social assistance card and clothing aid so that needy families can meet their food and clothing needs. With the social assistance card, families can shop for food in contracted chain stores.

Within the Scope of Social Assistance Projects as conducted by Directorate of Social Services, SAGLIK Co. offers financial support and training aid for needy persons and families residing in Istanbul.

Within the Scope of Management Services of Toilet Units across Istanbul, SAGLIK Co. provides staff and support services to the project as designed by Directorate of Parks and Gardens in order to manage the city toilets in various districts and central areas of Istanbul with a contemporary approach. It serves in a total number of 180 toilets across Istanbul, four out of which are mobile toilets.

Within the Scope of Sacrifice Sales and Management for Slaughter Areas, SAGLIK Co. provides Istanbulites with proper slaughter areas so that the sales of bovine and small cattle coming from
different regions can be carried out and the animal slaughter by professional butchers can take place in due form and hygienic conditions in technological slaughter units. During the project, 2160 slaughters took place in 5 different slaughter areas in 2016.

**Within the scope of Beach Management**, SAGLIK Co. serves the citizens with beach, café and kiosk facilities in Caddebostan, Anatolian Side and in Florya (Menekşe and Güneş beaches) European Side.

**In Private Flowers of Love Training and Rehabilitation Center**, besides special training and rehabilitation services for kids with disabilities, psycho-social services and physical therapy, SAGLIK Co. also holds informing seminars given by experts for the families of children with disabilities.
